condition is **Huntington's disease**, classified in class 424, subclass 562, for example.

- VII. Claims 19 and 22 (each in part), drawn to a method treating or ameliorating a neurodegenerative disease or condition in a mammal, wherein the disease or condition is **amyotrophic lateral sclerosis**, classified in class 424, subclass 562, for example.
- VIII. Claims 19 and 22 (each in part), drawn to a method treating or ameliorating a neurodegenerative disease or condition in a mammal, wherein the disease or condition is **Parkinson's Disease**, classified in class 424, subclass 562, for example.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. § 806.05 for inventive Inventions that are directed to <u>different</u> methods, restriction is deemed to be proper because these methods appear to constitute patentably distinct inventions for the following reasons: Inventions I, II, III, IV, V, VI, VII, and VIII are directed to methods that are distinct both physically and functionally, and are not required one for the other. Invention I requires search and consideration of a method of increasing stem cell number, which is not required by any of the other Inventions. Invention II requires search and consideration of identifying a gene, which is not required by any of the other Inventions. Invention III requires search and consideration of treating stroke, which is not required by any of the other Inventions. Invention IV requires search and consideration of treating Alzheimer's disease, which is not

required by any of the other Inventions. Invention V requires search and consideration of treating multiple sclerosis, which is not required by any of the other Inventions. Invention VI requires search and consideration of treating Huntington's disease, which is not required by any of the other Inventions. Invention VII requires search and consideration of treating amyotrophic lateral sclerosis, which is not required by any of the other Inventions. Invention VIII requires search and consideration of treating Parkinson's Disease, which is not required by any of the other Inventions.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and separate search requirements, restriction for examination purposes as indicated is proper.
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
